How Do We Act As Salt

- Salt has to be in contact with what it seeks to season or preserve before it works.
- The number one way for Christians to be salt is to show Christ's relevance by living His relevance in every area of life.
- If we keep Christ's relevance bottled up in the church, it's like keeping Salt in the shaker.

Penetration

- Christians must penetrate the world in the key areas of our culture if we want to preserve it.
- Christian penetration of the world is not easy.
- It is only when Christians offer "a more excellent way" that we command or deserve attention.
- We cannot be much of a moral disinfectant from afar, we must be in the community.

It Takes Just A Little Salt

- It only takes a little salt in a recipe for something to taste good, but If you leave out the salt the flavor is not the same.
- Salt is useless if it always remains in the container because it is not fulfilling its purpose.
- If our influence does not flow through the church and out into the world it is useless.

Conclusion

- Jesus has not entered our lives for us to just congregate.
- The only way we can add flavor and purity to the world in which we live is to become lambs that roar.
- You are where you are right now because God wants you there!
